Becreek on Lincoln.-Last Sunday week Rev. H W. Beecher preached a sermon on the death of President Lincoin, from the 4th and 5th verses of the 3tth chapter of Deuteronomy in which he proved that the assassination President Lincoln was but the expiring blow of the rebellion; that it was aimed at the life of the Government and the nation; that it had signally falled, and that Ahraham Lincoln, hough dead, had been clothed by the ever with new influence. The following was Mr

with new influence. The following was Mr. Beecher's peroration:

And now the martyr is moving in triumphal march, mightier than when alive. The nation rises np at every stage of his coming. Cities and States are his pall-hearers, and the cannon speaks the hours with solemn progression Dead, dead, dead, he yet speaketh. Is Washington dead? Is Ilampden dead? Is David dead? Is any man that was ever fit to live dead? Disenthralled of fiesh, rises to the unobstructed sphere where passion never comes, he bugins his illimitable work. His life is now grafted upon the intuite, and will be fruitful, as morarthly life can be. Pass on, thou that hast overcome. Your sorrows, oh people, are his sears; your bulks and bands and mudicel drums found triumph in his ears. Wail and weap here; God makes it echo joy and triumph there. Pass ou! Four years ago, oh Illinata, we took from thy midst an untited man, and from aurang the people; we return him toyon a mighty conqueror. Not thine any more, but the midst of this great continent his dust shall rest, a sacred treasure to myrlads who shall piligrim to that shrines to kindle anew their zeal and patriotism. Ye winds that move over the mighty prairies of the West, chant his requiem! Ye people, behold the martyr whose blood, as so many articulate words, pileads for fiderity, for law, for liberty!

The murder of Mr. Lincoln, more than four years after his induction into the office of President of the United States, is not the fulfillment of a tecent intention, nor is the gailt of it confined to the actual unreferr and his present active accomplices. EXTRAORDINARY TRIAL IN FRANCE—The Court of Assizes of the Averron last week tried a young man named Girand Sex, aged twenty-four, on a charge of having, on the 9th of January last, murdered a young farmer named Trenty, both of them residing at Folenac. It appears from the indictment that an improper intimacy had for some years existed between Trenty and the prisoner's sister Gabrielle. The prisoner was much annoyed at tala, and gave Trenty to understand that he must either discontinue his visits or marry. In May last, the prisoner threatfeed to take summary vengeance on Trenty if he did not do one or the other, and moreover, backed up his threats by the cogent arguments of a double-barrelled un and a brace of pistoss which he said he was prepared to use. Thus preceed, Trenty consented to be married, and the marriage contract was duly drawn up and signed, but, though Trenty received 1 000f. Of the 2. a. f. forming the young woman's wedding portion, he constantly deferred the wedding portion, he constantly deferred the wedding portion, he constantly deferred the wedding. The triesoner, who had been some much absent from Folesac, returned thinker in January has, and demunded ap ivate interview with Tenty, at a cafe where he happened to meet him. Trenty, however, refu ed to see him in private. The prisoner them windrew, and som after returned with a gun and other sport og accontrements He again pressed Trenty to grant him a few minutes' conversation, and they whatever together into a private toom. Soon after, two shots were heard, and Trenty was found I ing dead on the floor. Dr. Mott is the author of several standard works in the higher and more complete

Supper takes places at 12 clock, at which time the ladies of Frankfort present to the society a beautiful flag, gotten of or the occasion, after which all intend to eturn again to the ball-room. The Fenians of Lonisville ought to visit Frankfort on this occasion and see how well they carry out sn.h balls. Frankfort is noted for good balls, and, as will be expected, the Fenians' ball will be qual to any that has ever taken place there. We would ad ise all the Fenians of the city to go, or at least an that can conveniently do so.

PASSES. The system of requiring passes to obtained by those who wish to go to Washington is abolished. The Washington corresndent of the St Louis Democrat save that the ch are is expected to be extended to Savannah na Charleston. Why passes should be required of those going to Nashville, when they are abolshed, or about to be abolished for the three cities above named, is a mystery of red tapism that surpasses ordinary comprehension.

Lee's Men Arerving .- The arrival of de serters from Lee's army in Nashville last Satnrlay attracted considerable attention, as the men were formerly citizens of that place. A com oney numbering forty men, of the 12th Tennessee cavalry, under Capt. Clinton G. Lyons came in, having surrendered at Strawberr

D. in 1898. At the occasion of the Linther Feetival at Erfurt, the chairman of the Luther-Verein, H r Rheinthaler, expressed the wish to find some one of Luther's descendants, and, having ob tained the family pedigree in 1825, he soon found the desired track. The only son of the bove-mentioned John Michael Luther, Joseph Carl, born at Erfurt the 11th of November 1792, lived in extreme poverty at Stocken, in Bohemia, and had j ined the Catholic church, He had immigrated thither in 1811, married in time when Heinrich II Azschuber found him in his misery, the father of five children. He willingly accoded to Herr Holzschuher's wish to take his eldest son with him to educate. But nthon Luther displayed no talent, and he was not to a trade. From this line Catherine Lu ber, at Vienna, is supposed to descend. We refurther informed that there is in the Austrian ministry of finance a servitor of the name f Luther, who is likewise said to be a descenant of the Reformer. There is, we believe, a lineal descendant of the great Reformer in Poson, occupying an humble position in the warecooms of Messrs. Steinway & Son, the plane- Engine

It is estimated that the fences of the country constitute as much as half the alue of the farms, and these have to be continually renewed By having strictly-executed except such as surround pastures and stockards, may be dispensed with. Solon Robinson stated hat he was informed on good authority that the unfenced lands in that county are quite as nigh in price as the fenced farms of other couns, showing that this simple regulation will save the great expence of fencing the Western

The English daily published in Paris, Ga. ignani's Messenger, contains the following: "A rize of three thousand francs has been place ! at the disposal of the Society for the Encouragement of Aerial Locomotion, by means of apratus heavier than air. This was announced at a late meeting of the coclety by M. de Lanille, Vice-President, in his report on the operations of the year 1864. Several experimental pparatus have already been constructed, among ich we may mention that of M. de Groof, which, however, owing to the defective execution of some of its parts, is not yet in working order. An interesting experiment was made at Gravelles the other day. The members of the society who undertook it obtained some good results from a radimentary apparatus consisting of wings made of feathers, according to M Menuticle's method. By striking the air with these wings the experimentalists succeeded in rating themselves a few inches from the ground, a fact which partly confirm the ctory about the Viennesse watchmaker Daghen, and also the theory of those who maintain that demonstrative results may be obtained by the direct application of human strength alone."

passengers were returned prisoners from Andersonville, which place they left on the 17th of last February. Among them were the remuch at that point of the prisoners captured at Chickamauga and Gettasherg. They numbered altogether 1,966 men and 36 officers. A large number of horses were on the bas, which providentially became unresisting victims to the flames. Had they broken loose the fate of the swimmers would have been determined within two hundred yards of the bott. As near as can be estimated without other data than observation, between two and three hundred reached the bank, while about an equal number floated down the stream on doors and number floated down the stream on doors and

A dense mass, estimated at about five hundred, ook reluge on the bow of the boat, while the lames were driven aft by the wind. A few mo ments afterward the wheel-houses, lo seared hi by concussion and flames, fell off outward, and the concussion and flames, fell our outward, and the boat turned, stern up stream, reversing the flames. The largest part of this number un-t hen have perished, as they had no material a-build to throw over to anstain themselves, ex-cept a few bake of hay, which were immediatecept a few bales of hay, which were immediately esized on the turning of the boat. The gang planks were thrown overboard, but sank at once under their living freight, and rose too far each for most. The xawi-boat was launched, bottom up, from the lurricane-deck upon the heads of those below, and afforded a support for a few in that condition. The whole time before the boat was an entire sheet of fame, could not have exceeded twenty minutes. I was not more than one-third of the distance to shore when I observed the fact. The prison errepresented aimost every State in the Union, even Texas, and the colamity will be as widely felt as a battle of no inconsiderable proportions.
